HMDA Portfolio Fair Lending Analysis

GeoDataVision has created a suite of reports designed to help community banks identify Fair Lending performance issues. The following Tables are contained in the HMDA Portfolio Fair Lending Analysis:

- **Series 100 Portfolio Fair Lending Statistical Comparison Reports:** These tables extract data from your HMDA LAR and summarize and compare Minority and non-Minority mortgage application “Outcomes” including origination rates, denial rates and “dropout” rates.
 - Each “Outcome Variance” table compiles outcome comparisons based on a selection of “focal points” including (1) Mortgage Type, (2) Mortgage Purpose and (3) Lien Status as reflected in each Table Header. This allows comparison of your Minority and non-Minority mortgage activity results overall and for portfolio subsets just as examiners do.
 - Each “Redlining Risk” Table summarizes mortgage application activity by census tract income class and minority and non-minority census tract category to allow comparison of activity inside and outside the low- and moderate-income and minority communities.

- **Series 200 Application Potential Fair Lending Risk Comparison Reports:** These reports identify any Minority mortgage application that was (1) denied or (2) qualified as a “rate-spread” mortgage and compares those applications to non-Minority applications with similar characteristics that were originated or below the rate-spread. The tables focus on *records that fall within an adjustable range* of specified (1) income and (2) loan size parameters. *This allows for quick identification of any potential Fair Lending violation and comparison of the most important application variables including FICO score, LTV, Debt Ratio, etc.*

Report 100

Fair Lending Variance Summary Report Any Bank USA Records

Focal Points:
Mortgage Type: All
Mortgage Purpose: All
Lien Position: All

Minority Applications	Minority Originations	Minority Origination Rate	Minority Denials	Minority Denial Rate	Minority Dropouts	Minority Dropout Rate	Minority Rate Spread Units	Minority "Rate Spread" Incidence
83	49	59.04%	18	21.69%	16	19.28%	5	6.02%

White Applications	White Originations	White Origination Rate	White Denials	White Denial Rate	White Dropouts	White Dropout Rate	White Rate Spread Units	White "Rate Spread" Incidence
279	180	64.52%	51	18.28%	48	17.20%	18	6.45%

Outcome Comparisons

	Origination Incidence Variance	Denial Incidence Variance	Dropout Incidence Variance	"Rate Spread" Incidence Variance
Negative Comparison	0.92	1.19	1.12	0.93

Outcomes are compared based on the relative incidence of various outcomes. For example, the relative percentage of minority applications resulting in originations ("Origination Rate") is compared to the relative percentage of white mortgage applications resulting in originations. A perfect correlation is "1", meaning that the same percentage of minority applications were originated as majority applications. Results greater than "1" indicate a higher incidence of minority mortgage applications resulted in the outcome and results less than "1" indicate a lower incidence of minority applications with the outcome. For origination rate comparisons, a high number is a positive comparison whereas for adverse actions (denials and dropouts) and rate spread a number higher than "1" is an unfavorable ("negative") comparison. "Rate Spread" refers to mortgages whose rate met or exceeded the rate spread threshold as defined by the Regulation

Report 202

Review of Any Bank USA Records to Compare Originated Minority Applications with Rate Spread Against Originated White Application(s) Without Rate Spread but With Loan Amounts Within 20% and Incomes Within 10% of Minority Rate Spread Loan Record

Focal Points:
Mortgage Type: All
Mortgage Purpose: All
Lien Position: All

Denied Minority Application Number	Lien Status	LoanAmount (thousands)	Income (thousands)	Loan Term	Rate Spread	LTV	CLTV	FICO	DEBT RATIO
08-04-001992	1	262	75	360	3.033	46.79	50.72	664	34.167
Comparable White Application(s) Originated									
08-11-002330	1	233	68	360	2.804	94.9	94.9	740	35.448
08-09-002276	1	309	81	360	2.014	68.67	68.67	741	37.568

The rate spreads reflected in this report are the amount by which the loan's annual percentage rate exceeded the Treasury yield.

For a minority record to qualify for this report as a Rate Spread Loan, the loan must either be a first lien mortgage with a rate spread of greater than or equal to 3.0 or a second lien mortgage with a rate spread of greater then or equal to 5.0. These minority Rate Spread Loans are compared to similar loans to non-minority applicants without a qualifying rate spread (1st lien >= 3 or 2nd lien >=5).
